Education

10/2014 - 02/2017	**Elite Master's Program Software Engineering**, *TU & LMU Munich & University of Augsburg, GPA* 4.0 *w/ honors* Elite Graduate Program for a small group of students with a focus on the areas Formal Methods, Project Management, Distributed Systems, Databases, Human Computer Interaction and soft-skills. Additional courses in Machine Learning. **Master's Thesis** at *Harvard University* on the role of brain-inspired recurrent neural algorithms for advanced object recognition. Technologies: Java, C++, SQL, QVTO, Maude, CTL, LTL
10/2011 - 07/2014	**Bachelor's Program Information Systems**, *TU Munich, GPA* 3.8 Combination of economic fundamentals and computer science with a focus on Information Systems. **Bachelor's Thesis** at the *University of Sydney*: Investigation of hardware transactional memory and its effectiveness as a synchronization technique for databases, graded $A+$. **Study Abroad** at the *Auckland University of Technology*: Courses in Artificial Intelligence and Management. Project on a novel landmark-based approach to perceptual mapping (SLAM) at CAIR Technologies: Java, UML, SQL, C++, C, Assembly, ARIA
2003 - 2011	**Abitur**, *Gymnasium Dorfen, GPA* 3.7 Focus on Mathematics, Computer Science, Economics, English. **USA-exchange** with the *C.D. Hylton High school* in Virginia

All grades converted into the American 4-point system

Experience

04/2016 - 11/2016	**Research Assistant**, *Kreiman Lab, Harvard Medical School* Research at the bridge of machine learning, neuroscience and cognitive science with a focus on the role of recurrent connections. We improved object recognition performance on occluded objects from 45% with Alexnet to 74% with our models and offered a first possible application of recurrency in the human brain. We are also investigating the robustness of deep convolutional neural networks and the role of context for object detection Technologies: Matlab, Python, keras, Theano, Linux, ECoG, LSF

12/2015 - 04/2016	**Research Assistant**, *Oracle Labs* Enabled research teams to flexibly utilize the Oracle RDBMS on the internal cluster by developing an on-demand database module Technologies: Linux, LSF, Virtual Machines
07/2015 - 10/2015	**Software Engineering Intern**, *Siemens AG* Architectural concept and development of a behavior-driven testing framework that can run a test specification written in natural language and that is now used in three major business areas Technologies: Python
07/2012 - 12/2015	**Freelancer**, *Martin Schrimpf Software Solutions* Software Development and Services - projects include: *Greimel IT-Systemhaus GmbH* Led the development of a Document Management System including optical character recognition (OCR), a financial accounting interface and a dynamic workflow and process management system which made the client company effectively paper-free *R-Backup Datensicherung GmbH* Developed a multilingual website's front- and backend to administrate partners and customers and to issue invoices *Promonde JLT* Implemented an advertisement website for Arabic countries with over 10k users per day Technologies: Java, JavaScript, PHP

Publications

2016	H. Tang*, B. Lotter*, M. Schrimpf*, A. Paredes, J. O. Caro, W. Hardesty, D. Cox, and G. Kreiman, "Recurrent computations for pattern completion", *Under review*,
2016	M. Schrimpf, *Should i use tensorflow*, Seminar Paper, University of Augsburg. arXiv: `1611.08903 [cs.AI]`
2014	M. Schrimpf, "Scalable database concurrency control using transactional memory", Bachelor's Thesis, Technical University Munich

Presentations

12/2016	*Brains & Bits, NIPS Workshops* Recurrent computations for pattern completion
10/2016	*Systems Club, Harvard Medical School* Recurrent computations for pattern completion

Awards

2016	**FITweltweit**, *DAAD German Academic Exchange Service*
2016	**Teilstipendium**, *University Augsburg*
2016	**Integrationspreis**, *Government of Swabia*

2016	**Winner Social Society**, *Idea- and Startup-competition Generation-D*
2015	**Deutschlandstipendium**, *Federal Ministry for Education and Research, Roland und Ute Lacher Fonds*
2014	**Ministeriumsstipendium**, *Bavarian State Ministry for Education, Science and the Arts*
2013 - 2016	**e-fellows.net scholarship**

Extracurricular Activities

02/2016	**Artificial Intelligence Workshop** Organized a two-day workshop on Neural Networks, Machine Learning and Organic Computing. The speakers were Prof. Günther Palm, PD Rolf Würtz and Dr. Joschka Bödecker
Since 08/2015	**Co-Founder and Technical Lead**, *Integreat* Platform to deliver information from local authorities and helper organizations to refugees in over 80 German cities. Implementation of the administration backend and a cross-platform app, later coordination of the development community Technologies: Xamarin (C#), Android (Java), WordPress (PHP)
2015 - 2016	**MINGA Mentor for International Students**, *TU Munich*
Since 10/2013	**Rotaract Club München Residenz** Youth club of Rotary, based on the community, helping and learning. Social initiatives, e.g. with our orphanage sponsorship

Languages

German
Native proficiency
English
Full professional proficiency
Japanese
Elementary proficiency
French
Elementary proficiency

Interests

Travelling
Insights into various cultures in places such as Africa, Australia and India
Martial Arts
Sporty balance, perfection of techniques and meditation with Judo and Shaolin
Brain-inspired Computing
Getting behind the concepts of cognition and intelligence on the basis of biological findings, side projects in e.g. deep reinforcement learning and home automation

Mentored Students

Fall 2016	**Jacklyn Sarette**, *Emmanuel College* Behavioral experiments on visual context
Fall 2016	**Doré de Morsier**, *ETH Zurich* Behavioral experiments on the recognition of novel objects
Summer 2016	**Wendy Fernandez**, *City University of New York* Behavioral experiments and data analysis on the identification of occluded objects (MIT Summer Research Program)
